HEATING, PIPING & AIR CONDITIONING

including the Journal of The American Society of Heating and Ventilating Engineers

Index For 1954
Vol. 26, Nos. 1-12

For convenient use, the articles indexed have been classified and sub-classified under the major headings and under sub-headings. They have also been classified as general, fundamental, and by types of plants and buildings. There is also an index by authors.

"Most in Quantity, Most Authoritative, Most Quoted"

HEATING, PIPING & AIR CONDITIONING regularly runs more pages of editorial material on the subjects of heating, piping, and air conditioning in industrial, commercial, institutional and public buildings. During 1954, there were 224½ pages on heating, 167 pages on piping, and 375 pages on air conditioning — in addition to many pages of news, equipment developments, a complete Directory Section, etc. . . . . By actual count, articles in HPAC are "most quoted" in the leading text-books and handbooks in the field. . . . . HPAC's articles are written by authorities actively engaged in the field served. . . . . Its editorial staff has had many years of experience in the field served, and in editorial work.

Heating, Piping & Air Conditioning

January-December 1954 — Vol. 26, Nos. 1-12

Published monthly by the Keeney Publishing Company, 6 N. Michigan Ave., Chicago 2, Ill.

The index to the JOURNAL SECTION of the AMERICAN SOCIETY OF HEATING AND VENTILATING ENGINEERS is separate (see page xx).

This index does not include Equipment Developments; Recent Trade Literature; Meetings & Conventions; Who's What—departments appearing regularly in each issue. The Editors' Pages in each issue include items of news, comments on current events, etc. In the January issue a complete directory section was published covering heating, piping and air conditioning equipment for industry and large buildings.
